

The workplace changed. Most certifications didn't keep up.

Four generations. Hybrid teams. Emotional fatigue at every level. **Conversations do.** Fierce Train the Trainer equips your facilitators to lead the conversations organizations are actually having today.

WHAT IT IS

Fierce Train the Trainer is a **certification program that builds internal facilitation capability**. Your people learn to deliver Fierce content — from foundational conversation skills to advanced leadership modules — so development scales without ongoing external dependency. Choose Core, Advanced, or the Full Pathway based on your organization's needs.

"

Facilitators are being asked to lead conversations they were never trained for. This changes that.
